Profile

- Solve complex business problems by using .Net technologies to create novel solutions.
- Ability to handle highly stressed situations and unexpected errors in an efficient manner.
- Always excited to learn something new when being flexible and working on the team's most pressing problems.
- Manage assigned projects including resources and tasks management.

Work experience

04/2018 – present
Dahlgren, United States

Software Developer Joint Warfare Analysis Center (JWAC)

- Worked with analysts to gather business requirements to develop new or modify existing web and desktop applications, using ASP.NET and the .NET framework.
- Regularly presents at monthly IT tech exchange within the organization to define and maintain our IT methodology, principles, standards and guidelines.
- Mentor summer interns, where I introduce them to agile ideology, the SCRUM process, gather requirements from customers, make an agile release train, and hold murder board meetings with different audience types to fine-tune their final presentation.
- Investigates new technologies and services to determine worth to our command and works to integrate those valuable technologies and services into our environment such as SignalR, AWS, and Azure.
- Maintain and grow several legacy applications. Migrating from a monolith to a microservice architecture, by decoupling dependencies and services from the legacy application into new solutions, that other applications can use to solve the same problem.
- Lead and documented inhouse penetration tests on our various web applications. Testing and finding vulnerabilities like XSS, HTML injection, SQL injection, and business logic errors.

05/2016 – 08/2017
Bellingham, United States

Software Engineer (Intern) Dealer Information Systems (DIS) Corp.

- Handled a huge conversion of the company's main web application from jQuery/Thymeleaf 3.0.1 to Angular-JS and Single-Page application functionality with a more responsive and dynamic interface.
- Added Security controls to web application to provide authentication authorization and accounting using Spring Security

Education

01/2014 – 06/2017
Bellingham, United States

Computer Science | Bachelor of Science in Computer Science Western Washington University

Awards

08/2019

2019 Second Quarter, Mid-Tier Employ of the Quarter JWAC

Issued for my willingness to work across branches and bring my coding skills to the Service Desk team. Providing them with PowerShell scripts to automate weekly service ticket reports that included graphs and tables showing real time data on incidents across the command.

Certificates

10/2018

Security+ CompTIA

Required to perform admin functions on our various systems and networks.

04/2020

PenTest+ CompTIA

Obtained to keep Security+ certification and to follow personal passion.
